

Model VORTEX 750 SS 316 / 23

Description

Top-quality heavy-duty construction pump suitable to pump aggressive dirty waters, acid and alkaline effluents, sea water, etc. Its most frequent applications are in the food industries, on chemical, galvanic and tanning plants, in the fish industries and in several seaport applications.

Pumped fluid

Application Acid, alkaline and corrosive effluents
Max Density 1100 kg/m³
Temperature range 0-40 °C 32-104 °F
pH range 2-14 pH

Performance

Model		Head (m)								
		4	6	9	12	15	18	21	24	27
		Capacity								
VORTEX 750 SS 316 / 23	l/min	1425	1380	1295	1200	1135	1010	775	490	140
	m ³ /h	85,5	82,8	77,7	72,0	68,1	60,6	46,5	29,4	8,4
	l/s	23,75	23,00	21,58	20,00	18,92	16,83	12,92	8,17	2,33

Hydraulic

<i>Impeller type</i>	Bi-channel open impeller type
<i>Outlet</i>	DN 100 – vertical, PN 16, round counter-flange threaded 4" BSP
<i>Free passage</i>	35 mm
<i>Max head</i>	28 m (2.8 bar)
<i>Min head</i>	4 m
<i>Max capacity</i>	1425 l/min
<i>Min suction level</i>	180 mm

Electric characteristics

Model	Power (P₂)		rpm	Voltage	ph	I_N	Built-in float-switch
	HP	kW		V		A	
VORTEX 750 SS 316 / 23	7.5	5.5	2850	400	3~	11,3	NO

Technical characteristics

<i>IP</i>	68
<i>Sealing</i>	Double mechanical seal in oil bath + oil seal
<i>Max. immersion</i>	5 meters (with 10 meters cable)
<i>Protective coating</i>	None
<i>Sound pressure level</i>	< 70dB

Components & Materials

<i>Cable</i>	Neoprene H07RN8F, length 10 meters, 4G2,5 with free ends Resined cable gland for watertight sealing of the cable
<i>Impeller</i>	Stainless steel AISI 316L 1.4435 (A4)
<i>Pump support</i>	Stainless steel AISI 316L 1.4435 (A4)
<i>Discharge body</i>	Stainless steel AISI 316L 1.4435 (A4)
<i>Motor case</i>	Stainless steel AISI 316L 1.4435 (A4)
<i>Pump cover</i>	Stainless steel AISI 316L 1.4435 (A4)
<i>Motor shaft</i>	Stainless steel AISI 316L 1.4435 (A4)
<i>Screws</i>	Stainless steel AISI 316L 1.4435 (A4)
<i>Mechanical seal</i>	Lower: Silicon carbide / Silicon carbide / Viton / AISI 316 Upper: Alumina / Graphite / NBR / AISI 304
<i>Oil seal</i>	Viton
<i>Kit o-ring</i>	Viton
<i>Ball bearings</i>	Lower: 6306 LU C3, upper: 6204 LU C3
<i>Oil</i>	Dielectric, not polluting, not toxic

Motor characteristics

Type of motor	Hard-duty squirrel cage motor
Start type	DOL (Direct On Line)
Protection	Automatic reset built-in thermal protection; it is anyway suggested to connect the pump to an electric board with a magnetothermic switch (see optional section for electric boards)
Insulation class	Class F
Nos. of poles	2
Service type	S1 (with pump completely immersed into pumped fluid)
Cooling	Ensured by the immersion of the pump into the fluid

Optional available

Coupling foot	Coupling foot model DN100 in stainless steel AISI 304 (connection DN100)
Hose connection	Quick-coupling "storz" connection with DN100 hose connection in aluminum
Electric board	F6-0.5/10-3
No return valve	- Professional no-return ball check valve DN100 cast-iron, NBR ball - Professional no-return ball check valve DN100 AISI 316, FPM ball
Separated float switch	10 meters cable or 20 meters cable float-switch to be connected to an electric board F6-0.5/10-3
Anods	To avoid corrosion by galvanic currents

Dimensions & weight

Model	Dimensions (mm)									Weight kg	Pumps per layer on EPAL
